

About VTT

Living in an era of knowledge explosion, demand to understand important macro and micro-level changes, while systematizing unlimited information, is mounting day by day. True appreciation of socio-economic shifts and associated consequences can only be possible through immersive and on-ground field experiences, a service VTT Global specializes in.

Our vision to “Continually Empower Clients to Utilize and Profit from The Greatest Asset of This Age – The Ability to Interpret and Harness Information,” is the core driving force propelling our directed work. VTT Global provides customized cost-effective solutions to multiple industries: Corporate, Development, Energy, Technology Management, furnishing services in the realms of monitoring and evaluation, market research and analysis, management systems design and transformation, and program management.

With over two decades of experience, VTT Global has become one of the top management and strategy consulting firms, boasting a client list which includes USAID, DFID, IFC/World Bank, UN Agencies, GIZ, British High Commission, Tetra Tech Group (Management Systems International, Coffey International), Chemonics International, CARE, American Institutes of Research, ACTED, World Learning, Abt Associates, Social Impact, Pakistan Telecommunications Company Limited, Fauji Foundation and so on. We have reached out to more than 205,000 project participants through 65+ projects, that too merely within the past decade, employing diverse group of experts and field resources.

Locating in Pakistan has allowed the firm to establish extensive coverage and outreach in the country, including far-flung security risk regions. Yet, capitalizing on the no-borders limitation of the digital age, VTT also possesses the capacity to operate across the MENA region and Afghanistan. Complying with its recent expansion strategy, VTT Global is rapidly diversifying its portfolio, incrementally increasing its scope of work in the Energy sector. The firm has been consistently undertaking renewable energy assignments, working with World Bank/IFC, K-Electric, USAID-Engility, and GIZ over the past few years, to solidify its imprint in the industry. The firm has extended its in-house resources to include specialized sustainable energy experts, adding to the existing thematic knowledge cache.

Some of the prominent projects undertaken and our organizational contributions include:

- USAID-IRAM Monitoring and Assessments of Flood Relief Activities in Pakistan;
- USAID's Early Grade Reading Assessment-Baseline and Midline in Pakistan;
- Diagnosing commercial operations of Etisalat in Afghanistan;
- RF design services-Bechtel Communications, for network modernization of AT&T Wireless in USA;
- Multivariate Study for Grid-Connectivity and Power Generation Capacity of Hydropower Sites, in Congruence with Socio-Economic Demographics, across Gilgit-Baltistan for GIZ;
- Feasibility Study of Renewable Energy Adaption and Distributed Generation Potential in Major Industrial Zones of Pakistan, Covering 800+ Enterprises, for IFC;
- Research Study and Joint Analysis of Conflict and Stability in Pakistan for BHC/DFID/MoD/FCO; and
- CAPEX and OPEX Management Strategy, Re-Engineering of SCM Processes, Energy Optimization Framework and Telemetry Solutions for Helios Towers in Nigeria.

Firms approach us because they recognize our ability to provide an ideal amalgamation of knowledge, insight, and guidance needed to move forward with confidence. We believe in delivering in-depth understanding of thematic areas reinforced by rigorous analyses, to produce only the most effective and high-impact results. If a solution does not already exist, we will create a new solution that resolves your issue.

Providing consulting services since **2005**

65+ Medium to Large Scale projects completed

10+ Sectors

40+ Clients

Balochistan: 13/30

PRINCIPAL SERVICES

1 Research & Analysis

We have led research and analyses in the forms of Baseline thru End-line Studies along with Need and Impact Assessments, for projects based on the themes of Gender, Education, Poverty Alleviation, Health and Nutrition, Disaster Risk Reduction, Livelihood, WATSAN and Hygiene, Conflict and Stability, and Agriculture. VTT's institutional capacity and skills proficiency is explicated through the management of 100,000+ assessments under the USAID funded Pakistan Reading Program (PRP) and Sindh Reading Program (SRP). Since inception, we have successfully completed 40+ projects, conducted 193,000+ surveys, Focus Group Discussions (FGDs) and in-depth interviews for donors such as USAID, DFID, World Bank/IFC and the UN agencies.

2 Strategy & Transformation

We have studied and developed transformation strategies across the public and private sectors of Pakistan, Afghanistan, and the MENA region. VTT has performed pioneering work in this field by analyzing current structures and identifying fissures in the system, and accordingly revamping the organizational roadmap for the respective firm's future. In this domain, our clientele has comprised of the National Assembly of Pakistan, Etisalat, Helios Towers, Veon Group-Jazz, Pakistan Telecommunications Authority, KASHF Foundation, and Fauji Fertilizer Bin Qasim Ltd.

3 Monitoring & Evaluation

To date VTT Global has delivered 15+ internal, external, and third-party M&E assignments and mobilized of 1070+ resources across the toughest topographies of Sindh, Balochistan, Khyber Pakhtunkhwa/FATA, Gilgit-Baltistan, Azad Jammu & Kashmir, and ICT. This developing portfolio has enabled the firm to gain aptitude and understanding of intervention based monitoring mechanisms, retaining them into institutional repository.
